EDUCATION

Punjab Engineering College, Chandigarh 2020 – 2024 | Chandigarh, India
B.Tech in Electrical Engineering; CGPA: 7.29

SKILLS SUMMARY

Languages — Java, C++, Python, JavaScript.
Frameworks — Spring Boot, Nextjs, kafka.
Tools & Cloud — Kubernetes, Docker, Jenkins, Jira, Grafana, Maven, GIT, Redis, MySQL, MongoDB, AWS.

EXPERIENCE

Airbus India Private Limited 08/2024 – Present
Full Stack Developer (Full-time) Bangalore, Karnataka

- Developed and deployed a user-friendly document handling and reviewing platform, eliminating manual verification of airplane manuals across multiple stages and accelerating the review process by **5x**
- Engineered a scalable backend with **Spring Boot**, **PostgreSQL**, and **Kafka** in an **Agile** setup; designed role-domain mappings and integrated **AWS** services (**API Gateway**, **JWT**, **rate-limiting**) to securely process **1K+** monthly uploads with **99.9%** uptime.
- Architected a responsive UI with **ReactJS** and **Redux**, implementing role-based dashboards tied to domain mappings, real-time review workflows, and state management optimizations that reduced API calls by **50%**.
- Orchestrated deployment with **Docker**, **Kubernetes**, and **Jenkins CI/CD pipelines**, enabling auto-scaling, faster releases, and achieving **40% efficiency gains**; monitored and resolved on-call issues via **CloudWatch**.

Airbus India Private Limited 01/2024 – 07/2024
Full Stack Developer (Intern) Bangalore, Karnataka

- Implemented **REST APIs** for user authentication and **CRUD** operations in a supply chain management tool, reducing manual document workload by **20%**.
- Integrated **Freshdesk SSO** with **JWT authentication** and dashboard redirection, enabling **1-click** login and reducing manual authentication overhead.
- Optimized dashboards and real-time updates with **Next.js** and **React**, improving usability and workflow efficiency.
- Expanded backend test coverage from **40% to 82%**, significantly enhancing code reliability and maintainability.

PROJECTS

E-Commerce Platform (Self-Learning)
(Link: Github)
Engineered an e-commerce platform using Spring Boot **microservices** with RESTful APIs for product, inventory, and order management; applied **Spring Security** for **authentication** and access control; incorporated a **real-time database** for user activity and order tracking; used **Docker** for efficient deployment.

Research Assistant (Self-Learning)
(Link:Github)
Designed an **AI-powered** research assistant Chrome **extension** using **Spring Boot**, **React**, and **Google Gemini API**, enabling real-time website summarization and accelerating knowledge extraction.

Portfolio website (Self-Learning)
(Link: Github)
Implemented and deployed responsive portfolio websites using **Next.js (SSR & CSR)** and **Aceternity UI**, delivering faster load times and modern **UI/UX** design.

ACHIEVEMENTS

Leetcode
Solved 400+ algorithmic problems on LeetCode

Asset Management Club
Co-founded and led a student finance awareness community; defined mission and vision statements to establish long-term direction and engaged 100+ students through initiatives and events.

CERTIFICATES

- The Complete Spring Boot Development, Maven Crash Course, GIT In depth with BitBucket
- Learn DevOps: The Complete Kubernetes Course, Introduction to Cloud Computing on AWS
